Avery Quinn

Caregiver | Bend, OR | avery.quinn@example.com

Summary

Caregiver with more than twelve years of paid care for older adults and adults with disabilities, in assisted living, memory care, adult day programs and private homes.

Experience

Senior Caregiver, Cedar Hollow Assisted Living (full-time), June 2022 to present

• Helped residents with bathing, dressing, grooming and toileting while protecting their privacy and dignity.
• Prepared meals that followed each care plan, including soft, low-sodium and diabetic diets, and logged intake.
• Used gait belts, slide boards and mechanical lifts for safe transfers, following the two-person rule where required.
• Gave medication reminders on schedule and reported missed or refused doses to the nurse on duty the same shift.
• Kept clear shift notes on mood, appetite, sleep and skin condition in the charting system before handing over.
• Used calm redirection, familiar routines and simple choices with residents living with dementia.
• Walked with residents on daily exercise routines set by the physical therapist and noted any change in balance.
• Watched for early signs of infection, dehydration and pressure injuries and reported them right away.
• Kept rooms and shared spaces clean and safe: cleared trip hazards, checked call buttons and restocked supplies.
• Talked with families at visits and by phone about daily routines, within what the care plan allowed.
• Took part in weekly care team meetings and suggested changes to routines that were not working.
• Followed infection control steps, including hand hygiene, gloves and gowns, and isolation precautions.
• At Cedar Hollow Assisted Living, cared for between six and twelve people a shift and covered extra shifts during staff shortages.
• Mentored newer staff at Cedar Hollow Assisted Living on the facility's routines, safe lifting and how to write useful shift notes.

Home Caregiver, Riverbend Home Care (full-time), April 2020 to May 2022

• Prepared meals that followed each care plan, including soft, low-sodium and diabetic diets, and logged intake.
• Used gait belts, slide boards and mechanical lifts for safe transfers, following the two-person rule where required.
• Gave medication reminders on schedule and reported missed or refused doses to the nurse on duty the same shift.
• Kept clear shift notes on mood, appetite, sleep and skin condition in the charting system before handing over.
• Used calm redirection, familiar routines and simple choices with residents living with dementia.
• Walked with residents on daily exercise routines set by the physical therapist and noted any change in balance.
• Watched for early signs of infection, dehydration and pressure injuries and reported them right away.

• Kept rooms and shared spaces clean and safe: cleared trip hazards, checked call buttons and restocked supplies.
• Talked with families at visits and by phone about daily routines, within what the care plan allowed.
• Took part in weekly care team meetings and suggested changes to routines that were not working.
• Followed infection control steps, including hand hygiene, gloves and gowns, and isolation precautions.
• Helped residents with bathing, dressing, grooming and toileting while protecting their privacy and dignity.
• At Riverbend Home Care, cared for between six and twelve people a shift and covered extra shifts during staff shortages.
• Mentored newer staff at Riverbend Home Care on the facility's routines, safe lifting and how to write useful shift notes.

Memory Care Aide, Maple Court Memory Care (full-time), January 2018 to March 2020
• Used gait belts, slide boards and mechanical lifts for safe transfers, following the two-person rule where required.
• Gave medication reminders on schedule and reported missed or refused doses to the nurse on duty the same shift.
• Kept clear shift notes on mood, appetite, sleep and skin condition in the charting system before handing over.
• Used calm redirection, familiar routines and simple choices with residents living with dementia.
• Walked with residents on daily exercise routines set by the physical therapist and noted any change in balance.
• Watched for early signs of infection, dehydration and pressure injuries and reported them right away.
• Kept rooms and shared spaces clean and safe: cleared trip hazards, checked call buttons and restocked supplies.
• Talked with families at visits and by phone about daily routines, within what the care plan allowed.
• Took part in weekly care team meetings and suggested changes to routines that were not working.
• Followed infection control steps, including hand hygiene, gloves and gowns, and isolation precautions.
• Helped residents with bathing, dressing, grooming and toileting while protecting their privacy and dignity.
• Prepared meals that followed each care plan, including soft, low-sodium and diabetic diets, and logged intake.
• At Maple Court Memory Care, cared for between six and twelve people a shift and covered extra shifts during staff shortages.
• Mentored newer staff at Maple Court Memory Care on the facility's routines, safe lifting and how to write useful shift notes.

Program Aide, Willow Lane Adult Day Center (full-time), August 2016 to December 2017
• Gave medication reminders on schedule and reported missed or refused doses to the nurse on duty the same shift.
• Kept clear shift notes on mood, appetite, sleep and skin condition in the charting system before handing over.
• Used calm redirection, familiar routines and simple choices with residents living with dementia.
• Walked with residents on daily exercise routines set by the physical therapist and noted any change in balance.
